

RMC Mix Design Reports – M25, M30 and M40

Synthetic mix-design data for RAG testing and retrieval demonstrations

Mix Design – M25

Material	Quantity per m³	Unit
Cement	360	kg
Fly Ash	60	kg
Water	170	L
Fine Aggregate / Sand	735	kg
10 mm Aggregate	430	kg
20 mm Aggregate	650	kg
Admixture	4.0	kg

Mix Design – M30

Material	Quantity per m³	Unit
Cement	380	kg
Fly Ash	80	kg
Water	170	L
Fine Aggregate / Sand	720	kg
10 mm Aggregate	420	kg
20 mm Aggregate	650	kg
Admixture	4.2	kg

Mix Design – M40

Material	Quantity per m³	Unit
Cement	420	kg
Fly Ash	70	kg
Water	160	L
Fine Aggregate / Sand	680	kg
10 mm Aggregate	400	kg
20 mm Aggregate	650	kg
Admixture	4.8	kg

Design Notes

The quantities above are synthetic examples and are not approved construction mix designs. Actual production must use an approved laboratory mix design, project specifications, material test results, moisture corrections, and applicable standards.

RAG Metadata

Document Type: Mix Design Report | Domain: RMC | Grades: M25, M30, M40 | Keywords: cement, sand, 10 mm aggregate, 20 mm aggregate, water, admixture, mix proportion
